Art Unit: 2857

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. The phrase "one may infer" in claims 1 and 5 is a relative term, which renders the claims indefinite. The phrase "one may infer" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Application/Control Number: 09/695,703

Art Unit: 2857

4. Claims 1-9 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lewicki.

With regard to claims 1, 2, 5, and 6, Lewicki teaches a method and apparatus for testing an integrated circuit comprising: a mechanism for applying an offset inside a chopper stabilized circuit forming part of the circuit (col. 2, lines 48-60) and a circuit for checking whether the output of the chopper is within specification using 1/f noise specification (col. 9, lines 38-45).

With regard to claims 3 and 7, Lewicki teaches the circuit passing a 1/f noise test if the output of the chopper is within specification for a properly working chopper circuit (col. 3, lines 3-15).

With regard to claims 4 and 8, Lewicki teaches the chopper stabilized circuit being a chopper stabilized amplifier (col. 2, lines 52-54).

With regard to claims 9 and 12, Lewicki teaches a method of testing 1/f noise performance by using offset removal of a chopper circuit for measuring 1/f noise (col. 3, lines 3-10).

5. Claims 10 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Totani et al.

With regard to claims 10 and 11, Totani et al teaches a method of controlling an integrated circuit comprising the steps of providing access at the output and control of an offset of a chopper circuit (translated abstract). Although Totani et al does not teach

Application/Control Number: 09/695,703

Art Unit: 2857

designing an integrated circuit, it is inherent that Totani teaches "designing" and

"fabricating" because the finished design is embodied in the patent document.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. Nollet teaches an automatic symmetry correction for a current

chopper. Robinton et al teaches a method of offset compensation for a circuit.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Paul Kim whose telephone number is 703-305-7468.

The examiner can normally be reached on Monday-Thursday 10:00-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Marc Hoff can be reached on 703-308-1677. The fax phone numbers for

the organization where this application or proceeding is assigned are 703-308-7722 for

regular communications and for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is 703-308-

0956.
